

Where **Water Works**™

At HOH, we help you get the most from your industrial water supply, your heating and cooling systems, your facility team, and your budget.

For you, this means local, responsive access to water treatment and safety expertise, along with advanced tools, technology, and equipment to support your team and put you in confident control of system performance. We call this *Level 5 Water Care*, and in our 5-plus decades of service, we've helped countless facilities lower their cost of operation, extend the lifespan of their systems, maintain health and safety, reduce usage, and achieve compliance.

CAPABILITIES / EXPERTISE

*With broad, local coverage and a 50-year track record of highly responsive service, HOH puts water treatment and safety expertise at your fingertips, helping you work **faster, smarter, and safer.***

• **Core Water Treatment Services**

Water chemistry drives the efficiency & lifespan of your heating & cooling systems. With our core treatment program, we give you the expert guidance, service, and support to ensure your water quality is fine-tuned to optimize system performance across every season.

• **Water Safety Management**

Our SafePATH188™ program provides you with a simple pathway to meeting industry safety standards, helping you protect your people & reputation while avoiding fines, citations, and costly consulting fees.

• **Smart Controls & Automation**

The DASH360™ suite of tools gives you 360° visibility into your water health and system performance, so you don't have to rely on guesswork. This includes 24/7 remote monitoring, digital dashboard, real-time data, and automated multi-system controls.

• **Easy, Hands-off Treatment Delivery**

With the shortest lead times in the industry, we can resupply your treatment right at your point of use.

• **Water Conditioning/Pretreatment**

An experienced pretreatment technician can design, install & service water softeners and other water conditioning solutions, including reverse osmosis, chlorine dioxide, electrochemical treatment, and more.

• **HOH Laboratory Services**

HOH chemists utilize state-of-the-art instrumentation to deliver accurate, timely, and comprehensive lab analyses.

• **New Construction Services**

Our team of engineers deliver job-specific program design services, comprehensive submittals, competitive pricing, and unmatched ongoing water care service.

• **Treatment Product Availability**

With our own in-house production facilities, HOH gets you the treatment product you need, when you need it.

LEVEL 5 WATER CARE

Level 5 Service from HOH sets a new standard in water treatment excellence. Addressing each of your recirculating systems, it defines best-practice care in terms of water and energy savings, lifespan of your critical assets, and water safety compliance. Using a team approach and a continuous improvement methodology, we work closely with your facility personnel to ensure you operate at maximum potential throughout the calendar year, while giving you ongoing visibility of the results.

Achieve Maximum Efficiency & Automation of Your Energy-Consuming Heat Transfer Systems

Smart Controls

Our DASH360® program gives you 24/7 visibility and remote, automated control of critical performance measures.

- Expandable Smart Control technology
- Real-time dashboard data to maximize system efficiency & minimize downtime
- Remotely monitor key water metrics to ensure they meet target limits
- Analyze data trends and receive instant auto alerts to head off issues with timely corrective measures

Steam Boiler

Level 5 Water Care lays out for you a clear, step-by-step pathway to improving the performance of your recirculating systems. We combine best-practice water care with advanced tools such as tracer and sensor technology, and then peel back the curtain so you can track the impact on your utility bills.

Cooling Tower

Closed Loop

Water Safety

Bulk Delivery

When water is working right, you will see savings in energy usage, water consumption, and protection of your critical assets.

ANNUAL ROI

Results You Can See:

An effective water treatment program pays for itself in terms of annual dollars saved. When you sustain a high level of water quality over time, optimized for your particular recirculating systems, the efficiencies gained are significant. So are the health and safety benefits. This is the end goal of our **Level 5 Service**, and we make the outcomes as transparent as possible.
